

SolarInvert Energy Solutions

135 kW solar energy

Overview

How much power can a solar power system produce?

Maximum PV input power up to 204 kW. Max. PV Input Voltage of 1100 V and start-up voltage of 250 V. Rated Output Active Power spans from 120 kW to 136 kW depending on the model. Max. AC Output Apparent Power up to 136 kVA. Total Current Harmonic Distortion (THDi) is kept under 3%.

How much solar power does Nuremberg produce a year?

Seasonal solar PV output for Latitude: 49.4521018, Longitude: 11.0766654 (Nuremberg, Germany), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.62kWh/day in Summer.

How many solar PV locations are there in Germany?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 481 locations across Germany. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: Solar PV potential in Germany by location Highlight on our web hosting provider Hostinger!
