# Are solar panels suitable for homes in Georgia

## Overview

---

Solar conversion is a worthwhile endeavor for most Georgians, but it's not guaranteed to save money for every homeowner. Below, we'll discuss some of the factors that can affect the viability and value of solar panels on your property. You can assess your home based on these criteria to decide if solar.

As mentioned above, there are no statewide solar incentives in Georgia and very few local incentives to entice homeowners to switch. However, solar panels still bring homeowners plenty of upsides throughout the state. We'll discuss some of the most.

Generally speaking, Georgia is a great place to go solar. The state receives more sunshine than most, has cheaper solar equipment than most states and has higher energy consumption than average, making solar worth the investment for most homeowners.

Some of the heavy lifting on your part will be done once you determine that solar is a worthwhile investment for your home, but there are still quite a

Are solar panels worth it in Georgia?

For most homeowners, the answer is yes — however it can depend on several factors like the size of your home, how much energy you use, and available incentives that you qualify for. Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Are solar panels a good investment in Georgia?

The main drawback is the high upfront cost of purchasing and installing the equipment. On the bright side, once that's paid for, solar panels can significantly reduce or even eliminate your electricity bills. For many Georgians, the long-term savings outweigh the upfront costs over time.

Do solar panels pay for themselves in Georgia?

Once you know your current energy consumption, you can calculate your potential savings and the time it should take for your solar installation to pay for itself. In Georgia, solar panels usually pay for themselves within 10 years.

3. Georgia solar incentives: federal and state.

How much does a solar system cost in Georgia?

In Georgia, a typical residential solar system costs \$9,555 to \$27,300, depending on the size of your system and what financial incentives you qualify for. On average, it takes solar panels approximately 10 years to pay for themselves in Georgia. Over 25 years, Georgia homeowners with solar panels avoid \$57,429 in total utility costs on average.

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.

Does Georgia have solar?

Want Solar?

Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity\*, generate significant carbon-free energy for Georgians during sunny, daylight hours.
