Cambodia integrated communication base station wind power

Overview

What is a wind farm in Cambodia?

Located in Mondulkiri province, the wind farm will tap into Cambodia's untapped wind potential, demonstrating the feasibility of large-scale wind energy projects. It aims to diversify the country's energy mix, support its growing electricity demands, and contribute to its clean energy transition.

What does the IA mean for Cambodia's wind farm?

Together, we are not merely constructing infrastructure but shaping a cleaner, greener future for Cambodia." Under the terms of the IA, Leader Energy will manage the wind farm for a 25-year period, reflecting its long-term commitment to driving sustainable energy solutions in the region.

How is Cambodia transforming its energy sector?

Cambodia is undergoing a significant transformation in its energy sector, balancing economic growth with sustainability. The government is implementing energy efficiency policies, expanding renewable energy sources, and modernizing infrastructure to reduce electricity costs and improve accessibility.

How will electricity efficiency policy work in Cambodia?

The policy will be enforced through the Ministry of Economy and Finance, working alongside customs and tax departments to regulate imports. By setting clear electrical efficiency standards, Cambodia aims to minimize wasteful energy consumption, potentially eliminating the need for additional power plants.

What challenges does Cambodia face in achieving its energy goals?

Despite progress, Cambodia faces challenges in achieving its energy goals: High electricity costs due to transmission inefficiencies and fossil fuel dependency. Limited rural access, requiring innovative off-grid solutions.

Environmental concerns over hydropower projects impacting ecosystems.

What are the different types of electricity licensees in Cambodia?

Currently, Cambodia has two types of electricity licensees: Independent Power Producers (IPP): These companies generate and sell electricity to suppliers or industries through Power Purchase Agreements (PPA). Consolidated Licensees: These entities handle generation, transmission, and distribution, selling power directly to consumers.

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
