

SolarInvert Energy Solutions

China-Europe Solar Photovoltaic System

Overview

Does China make solar panels?

China has invested over USD 50 billion in new PV supply capacity – ten times more than Europe – and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011. Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%.

Are Chinese-manufactured solar panels putting up in European warehouses?

Chinese-manufactured solar photovoltaic (PV) panels are piling up in European warehouses, with Rystad Energy forecasting 100 GWdc of solar capacity in storage by the end of 2023.

Where do European solar panels come from?

The vast majority of those panels and parts came from China – in some cases, 95%, International Energy Agency data show. Yet the green energy boom hasn't helped Europe's few local solar panel manufacturers, which have hit crisis point, crushed by cheaper imports and oversupply.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

Are cheap Chinese solar panels driving record solar energy installations?

A flood of cheap Chinese solar panel imports is driving record solar energy installations. But those same imports are crushing Europe's few local solar manufacturers. Governments and industry are split over how to respond. The Reuters Power Up newsletter provides everything you need to know about the

global energy industry. Sign up here.

Is Europe playing catch up with China's solar industry?

With some Chinese solar firms able to sell even below production costs, Europe is playing catch up. "The solar industry in China has been strategically subsidised with hundreds of billions of dollars for years," Erfurt told Reuters. (\$1 = 0.9310 euros) Reporting by Kate Abnett and Nina Chestney.
