Estimated Power Budget for Israeli Mobile Base Stations

Overview

What is Israel's Defense budget?

Israeli prime minister Benjamin Netanyahu and Israeli Minister of Defense Yoav Galant attend vote on the state budget at the assembly hall of the Knesset, the Israeli parliament in Jerusalem, March 13, 2024. (photo credit: YONATAN SINDEL/FLASH90) The defense budget approved by the government for 2025 is NIS 117 billion, or 6.5% of Israel's GDP.

Why did Israel increase military spending in the first quarter of 2024?

The increase in military spending is part of a broader trend of elevated state expenditure due to the war in the Middle East. During the first quarter of 2024, government consumption in Israel reached over [Log in or register to access precise data](#). [Log in or register to access precise data](#). [Log in or register to access precise data](#).

Are Israel's budget planners anticipating less armed conflict in 2025?

This suggests that Israel's budget planners are anticipating less armed conflict in 2025. The increase in military spending is part of a broader trend of elevated state expenditure due to the war in the Middle East. During the first quarter of 2024, government consumption in Israel reached over [Log in or register to access precise data](#).

What ramifications of increased military spending are evident in Israel's debt?

The ramifications of increased military spending are evident in Israel's national debt figures. By the third quarter of 2024, general government debt had swelled to over [Log in or register to access precise data](#). [Log in or register to access precise data](#). billion U.S. dollars). This represented a 20 percent increase in just 12 months.

Are Houthi rebels still firing missiles at Israel?

Houthi rebels in Yemen, however, are still firing ballistic missiles at Israel. Last

month Israel passed its 2025 budget — the largest in Israeli history — which will be NIS 756 billion (\$203.5 billion), or NIS 620 billion excluding debt servicing, for a 21 percent rise in spending over 2024.

What is the largest energy consumer in a base station?

The largest energy consumer in the BS is the power amplifier, which has a share of around 65% of the total energy consumption . Of the other base station elements, significant energy consumers are: air conditioning (17.5%), digital signal processing (10%) and AC/DC conversion elements (7.5%) .
