

SolarInvert Energy Solutions

Greek Solar System Engineering Company

Overview

How many MWp solar systems are installed in Greece?

More than 3 MWp solar systems have been installed in Greece, contributing to improve the country's renewable energy footprint through 2,671 tons of CO₂ savings. One of the largest Greek installations is the 400 kWp solar project in Oropos, near the capital city Athens.

What is the largest solar project in Greece?

One of the largest Greek installations is the 400 kWp solar project in Oropos, near the capital city Athens. This ground-mounted photovoltaic project, split into four installations with a power capacity of 100 kWp each, is connected to the national grid generating up to 580,000 kWh per year.

What is the future of solar energy in Greece?

Photovoltaics are now the number one renewable energy source in Greece with new solar capacities, both connected to the grid. The Greece solar energy market is expected to witness a CAGR of more than 8% during the forecast period, 2022-2027. The COVID-19 outbreak
