

SolarInvert Energy Solutions

Iranian Power Energy Storage Cabinet

Overview

Despite being a country with huge oil and gas reserves, Iran suffers from a severe energy crisis. The Iranian energy crisis is a multifaceted problem that has been exacerbated by a combination of factors, including poor governance, foreign policy failures, and the dominance of industries under the (IRGC). As of November 2024, Iran faces its most severe energy crisis.

What is Iran's energy infrastructure like?

The country's energy infrastructure is outdated and in disrepair, with many refineries and power plants operating below capacity. Iran's energy supply is unreliable, with frequent blackouts and shortages affecting daily life, industries, and essential services.

Why is Iran's energy supply unreliable?

Iran's energy supply is unreliable, with frequent blackouts and shortages affecting daily life, industries, and essential services. The IRGC's control over key industries, including power generation and distribution, has hindered efficient management and strategic planning.

How much electricity does Iran need in 2024?

In the summer of 2024, Iran's electricity shortage was estimated at around 14,000 megawatts, equivalent to twice the total electricity production of Azerbaijan. Previous estimates by the Ministry of Energy and the Majlis Research Center indicated that Iran needed to add 5,000 megawatts (7%) to its electricity production annually to avoid shortages.

Why does Iran have a power crisis?

Despite these challenges, Iran's government has failed to modernize its electricity sector, leading to frequent power outages and energy crises throughout the year. One of the main issues exacerbating Iran's energy shortages is the rampant smuggling of fuel. The government claims to have increased fuel exports.

Is Iran's industrial sector gutted by a crippling energy crisis?

"Iran's Industrial Sector Gutted by Regime's Crippling Energy Crisis". NCRI. Retrieved 2025-06-17. ^ "Iran Reduces Power to Major Industries Due to Electricity Shortage". iranwire.com. Retrieved 2025-06-17.

How has privatization affected Iran's energy sector?

The privatization of key power plants in recent years has also contributed to the deterioration of Iran's energy sector. Faced with budget constraints, the government transferred many power plants to private, often politically connected, investors.
