Lithium-ion pack battery standards

Overview

The IEC 62133 standard sets out requirements and tests for the safety and performance of lithium ion batteries used in portable electronic devices, including cell phones, laptops, tablets, and other devices. What are the UL standards for lithium ion batteries?

They have specific standards that ensure the safety of lithium-ion cells in consumer electronics (UL 1642), apply to battery pack durability (UL 2054), apply to EV battery safety (UL 2580), and apply to portable lithium batteries (UL 62133-2). 2. IEC (International Electrotechnical Commission) Standards.

What are the IEC standards for lithium batteries?

IEC standards address general, safety, and transportation specifications. For lithium batteries, key standards are: IEC 62133: Secondary cells and batteries containing alkaline or other non-acid electrolytes – safety requirements for portable sealed secondary cells and for batteries made from them, for use in portable applications.

Are lithium batteries UL certified?

Don't compromise on safety. Always verify the UL certification level of your lithium batteries and choose pack-level certified options for the ultimate in performance and peace of mind. Safety is paramount in the world of lithium batteries. One of the most recognized and trusted safety standards is UL certification.

What is the IEC 62133 standard for lithium ion battery safety?

The standard covers various aspects of battery safety, including electrical, mechanical, and chemical safety. IEC 62133 is widely recognized and used by manufacturers, regulators, and other stakeholders in the lithium ion battery industry as a benchmark for battery safety.

What are the shipping regulations for lithium batteries?

The U.S. DOT (United States Department of Transportation) defines shipping regulations for the U.S. under 49 CFR, Sections 100 - 185. Section 173.185 specifically addresses specifications and exceptions and packaging for lithium batteries; section 172.101 covers shipping.

Are lithium batteries regulated?

Shipping batteries is highly regulated, and anyone involved in packaging or handling battery shipments must complete annual certification training. These regulations apply to all lithium battery types and are strictly enforced by agencies such as DOT, IATA, and IMDG.
