Tieling Portable Power Supply

 **TAX FREE**    

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

What is the best portable power supply?

After carefully researching all of the different options on the market today, we have concluded that the SUAOKI Portable Power Station is by far the best portable power supply out there. It comes with a multitude of charging ports and options, which means that if you have a device that needs to be charged, this unit will have you covered.

How do you charge a portable power supply?

You can choose to charge it with a wall plug, DC outlet in your car, or, if you are feeling adventurous, with solar panels. This makes it a truly versatile device that is designed to be used both in the home and on the go. If you are in the market for a great portable power supply, we highly recommend that you give this one a try!.

How long do portable power supplies last?

The batteries that are used in portable power supplies are usually lithium-ion batteries. Even if these batteries are not used constantly, they will still age. They do not have a terribly long lifespan. In fact, even if you barely use your power supply, the battery will probably only last you two to three years at full capacity.

What types of outlets can a power supply accommodate?

The types of outlets that your power supply can accommodate are, once again, up to your personal preference. If you are only going to be charging a laptop or just want to power a desk lamp, then you can get by with a few regular, AC plug-in outlets.

What features should you consider when buying a power supply?

These might include things like flashlights, hazard lights, battery indicators, and output meters. Two of the better extra features to keep in mind are an

overheating protection system, as well as a surge protector. These two features will help to make sure that your power supply doesn't sustain any damage due to heavy use.
