

## SolarInvert Energy Solutions

# UK Liquid Cooled Energy Storage Management

## Overview

---

Are liquid cooled battery energy storage systems better than air cooled?

Liquid-cooled battery energy storage systems provide better protection against thermal runaway than air-cooled systems. “If you have a thermal runaway of a cell, you’ve got this massive heat sink for the energy be sucked away into. The liquid is an extra layer of protection,” Bradshaw says.

What is the difference between air cooled and liquid cooled energy storage?

The implications of technology choice are particularly stark when comparing traditional air-cooled energy storage systems and liquid-cooled alternatives, such as the PowerTitan series of products made by Sungrow Power Supply Company. Among the most immediately obvious differences between the two storage technologies is container size.

What are the benefits of liquid cooling?

The advantages of liquid cooling ultimately result in 40 percent less power consumption and a 10 percent longer battery service life. The reduced size of the liquid-cooled storage container has many beneficial ripple effects. For example, reduced size translates into easier, more efficient, and lower-cost installations.

What are the benefits of a liquid cooled storage container?

The reduced size of the liquid-cooled storage container has many beneficial ripple effects. For example, reduced size translates into easier, more efficient, and lower-cost installations. “You can deliver your battery unit fully populated on a big truck. That means you don’t have to load the battery modules on-site,” Bradshaw says.

Who owns Sungrow energy storage?

Learn more about Sungrow by visiting: Constantine Energy Storage (CES) was founded in 2022 as a platform to construct, own and operate best in class

institutional grade battery energy storage systems (BESS). Alberta Investment Management Corporation (AIMCo) and investment manager Railpen jointly own a 94% stake.

Why should you choose Constantine energy storage?

Constantine Energy Storage is at the very forefront of enabling the energy transition on these shores, and we at Sungrow are happy to assist them in creating a better, cleaner future for everybody. We hope this agreement will be a forerunner for other important deals in the future.”
