

SolarInvert Energy Solutions

West Africa Grid-connected Inverter

Overview

Can off-grid systems provide energy services in West Africa?

Off-grid systems using solar power are increasingly providing energy services in the region. Moreover, regional cooperation through programs such as the West Africa Power Pool (WAPP) is making it possible to supply energy to 14 AFW countries—benefiting 64 percent of the total AFW population.

Why should West Africa synchronize its power grids?

The synchronization of West Africa's national power grids marks a major leap in providing cleaner, more reliable electricity in a region historically challenged by unstable and costly power generation. A key benefit includes harnessing Guinea's abundant hydropower potential (approximately 6,000 MW), allowing its distribution throughout the region.

How is energy access expanding in western and Central Africa?

Political commitment, improved regulatory frameworks, and public and private financing are driving progress in energy access expansion across Western and Central Africa (AFW). Off-grid systems using solar power are increasingly providing energy services in the region.

Will West Africa have new interconnectors?

The West Africa power transmission corridor, which would encompass the North Core Interconnection and numerous other regional initiatives, is also being expanded to incorporate new interconnectors.

Are PV mini-grids affecting rural electrification in SSA?

Over the past decade, from 2010 to the present, the rate of rural electrification in SSA has risen by about 11% . Currently, there are 11 million operational mini-grids, exemplifying the positive impact of PV mini-grids on rural electrification in the region .

West Africa Grid-connected Inverter

80KW Three-phase inverter for off-grid solar system projects in West Africa

Military: Off-grid three-phase inverters are used in military applications, such as powering remote bases and equipment in the field. Offshore: Off-grid three-phase inverters are used in offshore ...

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
