Overview

Where is Zimbabwe's Electricity produced?

Much of Zimbabwe's electricity is produced at the Kariba Dam Hydroelectric Power Station (about 750 MW), at Hwange Thermal Power Station which has an installed capacity of 920 MW, and at three minor coal fired stations.

What kind of power does Zimbabwe use?

Zimbabwe relies on hydroelectric power. In rural parts of the country, 80-90% of the people depend on wood fuel and kerosene for cooking lighting. Food processing tasks like milling grain are usually carried out with diesel-powered system .

What are the energy supply options in Zimbabwe?

The energy supply options fro Zimbabwe have a mixture of hydroelectricity, coal and renewable sources. The grid is well developed with efforts after 1980 having extended supplies to rural business and government administrative areas .

Does Zimbabwe have load shedding?

Zimbabwe currently uses 1,471 MW and does not experience load shedding as power is imported from neighbouring Zambia, South Africa and Mozambique. Kariba Hydro Power Station and Hwange Coal Power Station (coal) are the main electricity generators with Independent Power Producers (IPP) contributing 12 MW.

How many biogas plants are there in Zimbabwe?

More than 200 biogas plants have been installed in Zimbabwe, mainly by the Department of Energy. (African Energy Policy Research Network (AFREPREN) . There is also great potential for generating electricity sing biogas from animal waste due to the large population of livestock in Zimbabwe.

What is Zimbabwe's hydropower potential?

Zimbabwe has a hydropower potential of 18,500 GWh a year, of which 17,500 GWh is technically feasible. To date about 19% of the technically feasible potential has already been exploited. Rusitu Hydro, a mini hydro plant of 750 kW operated privately sells power to the state-owned company, Zimbabwe Electricity Supply Authority Holdings (ZESA).
