

SolarInvert Energy Solutions

30gwh energy storage power station

Overview

What is India doing with 30 GWh battery storage?

India approves Rs 5,400 crore viability gap funding to develop 30 GWh battery storage, aiming to attract Rs 33,000 crore investment. Transmission charge waivers extended; Rs 90,000 crore undersea power lines to Saudi Arabia & UAE planned to support renewable energy and export goals.

Why is reliance investing in stationary energy storage systems?

In addition to sodium-ion technology, Reliance is investing heavily in stationary energy storage systems (ESS). These systems are crucial for balancing the intermittent nature of renewable energy sources like solar and wind.

How many GW of electricity will a new transmission project carry?

The two transmission projects, coming as a part of the government's focus on boosting electricity exports, are expected to have a capacity of carrying 2 GW of electricity each. (Representational Image/Reuters)
