40kW lithium battery pack

Overview

What is a 40 kWh solar battery system?

Experience off-grid living with our 40 kWh solar lithium battery system featuring LiFePo4 48V 800Ah storage. With a home voltage of 51.2V, our system offers reliable and sustainable energy storage for your residential needs.

What is a lithium battery backup system?

Whether you're looking for a backup power supply or a complete off-grid solution, our lithium battery system provides efficient and long-lasting energy storage to power your home or business. Coremax AXE 5.0L Iv style battery is an intelligent 40kWh solar battery backup system for home appliances.

Is LiFePO4 a good battery for solar storage?

LiFePO4 is a popular technology for stationary storage systems due to its uniquely high chemical stability and resulting high reliability, durability and long lifespan. This lifepo4 battery for solar storage is an ideal addition to solar panel systems.

What are the advantages of lithium iron phosphate battery?

Using Lithium iron phosphate battery, which has high safety performance, long cycle life, with service life of more than 20 years. Small size, light weight, easy to carry, which can be quickly applied to various scenarios. Operating Temp. Max. Storage Temp. Max. Max. Voltage 1.

How long does a LiFePO4 battery last?

Our 16-cell LiFePO4 battery boasts an impressive lifespan of 2500 to 7000 cycles over 10 years. Equipped with an advanced Battery Management System (BMS), it's safeguarded against overcharging, deep discharges, overloads, overheating, short circuits, low temperature cut-off, and boasts an exceptionally low self-discharge rate.

Do lithium batteries need a BMS board?

While most Lithium batteries necessitate BMS boards for protection, our controller stands out by functioning effectively with BMS-less batteries. Its diverse range of protection capabilities, including over-voltage, over-charge, low-voltage, deep discharge, and over-temperature compensation, ensures optimal battery performance and longevity.
