

## SolarInvert Energy Solutions

# 550W photovoltaic panel parameters and specifications

## Overview

---

What is a 550-watt solar panel?

This 550W solar panel is an high-powered option for generating maximum power from limited roof space. - It's an economical long-term investment for utility-scale systems, solar power plants, and residential and commercial applications.

Why is Trina Solar 550W series a good choice?

Trina Solar 550w photovoltaic panel specificat technology solutionsSolar'smulti-busbars suchasnon-destructive cut ing and high-density cell interconnect technology. Why is Trina Solar 600w/550w series a good choice?

There are mainly two reasons that Trina Solar's 600W/550W series modules contribut.

Why is the 600W 550W series a good choice?

to the outstanding resistance to hot-spot effect. Firstly,the 600W/550W series uses the most advanced cells production line,which holds the hig est cells manufacturing standards in t e industry. The leakage current Irev is minimize.

Do the specifications vary?

The specifications may vary slightly. All specifications are in accordance with standard EN 50380. Color differences of the modules relative to the figures as well as discolorations of/in the modules which do not impair their proper functioning are possible and do not constitute a deviation from the specification.

How do I know if my PV module has EI?

(Speed of 23m/s) Multiple EL tests throughout the production line EL images can be requested with each purchase Make sure your PV module doesn't look

like the image to the right. An EL looks like an X-Ray which spots cracks and power loss areas invisible to the naked eye. safety glass with anti-reflective coating.
