5G base stations in the Nordic communications market

Overview

Are Nordic operators celebrating 5G availability?

Analysis of Speedtest Intelligence ® data confirms that Nordic operators have much to celebrate. In Q4 2024, Nordic countries claimed three of the top five positions in Europe for 5G Availability—the percentage of users with 5G-capable devices spending most of their time connected to 5G networks.

What makes the Nordics a great 5G country?

Within Europe, the Nordics stand out on 5G performance. Part of this is because of 5G spectrum availability as all four of the Nordic countries on the continent have already assigned low-band and mid-band spectrum. This is ahead of the rest of Europe, as we have reflected on the 5G progress across Europe.

Is the Nordic region a good place to invest in 5G?

Home to two of the world's largest radio vendors, Ericsson and Nokia, and characterised by markedly higher operator profitability than much of the rest of Europe, the Nordic region remains a key bright spot in Europe's struggle for competitiveness against the Middle East, North America and Asia in 5G.

Does the Nordic-Baltic region have a strong 5G network?

regional SWOT analysis to the right, the Nordic-Baltic region features many strong 5G points. The large number of testbeds indicate great interest from many stakeholders, particularly within the transport and manufacturing industries. However, the test activities suffer from a lack of terminals. The few 5G terminals that have.

Which region dominates the 5G base station market?

The Asia-Pacific region continues to dominate the global 5G base station market, with a projected CAGR of approximately 38% from 2024 to 2029. This region represents the most dynamic and fastest-growing market, led by

significant deployments in China, Japan, South Korea, and India.

How have Nordic countries positioned themselves in the 5G cycle?

Nordic countries have distinguished themselves in the 5G cycle through the timely release of mid-band spectrum assets, the development of innovative government policies to enable widespread rollout beyond core urban centres and a unique appetite for network sharing.
