

## SolarInvert Energy Solutions

# AC dual-purpose inverter

## Overview

---

Using a dual inverter air conditioner gives you reduced power consumption. However it has other benefits which makes the air conditioning experience better in other ways. Here are the advantages of air conditioner and why using a dual inverter air conditioner is a better choice: .

An air conditioner that does not use inverter technology i.e. a non-inverter air conditioner has limited functioning when it comes to power.

Dual Inverter Air Conditioner is an advanced version of simple inverter air conditioner. It has the same capability to reduce the power consumption according to the operation required but better. Dual Inverter Air Conditioner uses twin rotary compressor contrary.

Dual Inverter Air Conditioner uses twin rotary compressor that is able to perform cooling better and much more efficient compared to non-inverter and simple inverter air.
