# Albania s first batch of 5G communication base stations

## Overview

---

What percentage of Albanians have 3G and 4G?

In 2019, 99.2% of the population had 3G network coverage, while 4G covers about 95% of the population in Albania.<sup>23</sup> During the same year, the mobile-broadband Internet traffic within the country corresponded to 0.069 exabytes.<sup>24</sup> 3. Current progress on 5G: consultations and national strategies .

Should Tirana have a 5G network?

5G networks should be available to residents in urban and rural areas, at speeds of at least 100 Mbps; Tirana's 5G network should provide 50% of the houses, businesses and public institutions with a mobile broadband service with speeds of at least 1 Gbps. 7. If 5G specific rules are drafted, what do they say?

.

Is Albania's fibre optic network growing?

According to the Digital Agenda for 2015-2020, Albania's physical extension of fibre optic infrastructure reached 5,000km in 2015, and the network has been growing ever since.<sup>21</sup> Broadband is currently supplied 10 Ibid., 24.

Where should 5G networks be available?

5G networks should be available in at least one big city, the main transport corridors, strategic economic areas, health and educational institutions, and public open areas; 5G networks should be available to residents in urban and rural areas, at speeds of at least 100 Mbps;.

When did 4G start?

4G services were launched in July-September 2015 using the 1800 MHz frequency band covering between 65% and 85% of the population.<sup>25</sup> 4G infrastructure is present in most cities but not in all rural areas, though AKEP

issued 2 authorizations to two operators in the 800 MHz band (4G) in 2018 to improve coverage.

Will 5G rules be included in the UK's electronic communication law?

The regulator aims to include 5G rules in its primary electronic communication law. Amendments are currently being drafted, and expected to go to public consultation by March 2023. 8.
