

SolarInvert Energy Solutions

Algeria energy storage tank price comparison

Overview

How much liquid fuel is produced in Algeria?

Algeria's total liquid fuels production has steadily declined over the past decade. In 2023, total liquid fuels production was about 1.4 million barrels per day (b/d), down from 1.7 million b/d in 2014. Most of Algeria's total liquid fuels production is made up of crude oil and lease condensate.

How much natural gas is consumed in Algeria?

Dry natural gas production in Algeria averaged about 3.3 trillion cubic feet (Tcf) between 2014 and 2023, and dry natural gas consumption averaged 1.6 Tcf over the same time period. In 2020, both natural gas production and consumption fell as the COVID-19 pandemic limited mobility and economic activity in the country.

Does Algeria have enough electricity?

Algeria has enough electricity supply to meet its domestic consumption, given its substantial natural gas reserves and the predominant use of natural gas in power generation. Algeria's electricity exports are limited by its electric transmission capacity.

Does Algeria have solar power?

Algeria has renewable energy potential along its relatively long coastline on the Mediterranean Sea, which is suitable for wind, while desert regions offer significant solar power potential. Algeria has 13 hydropower plants, mainly located in the northern parts of the country, where rainfall is relatively plentiful.

Who owns Algeria's oil refineries?

- Sonatrach, Algeria's state-owned oil company, solely owns and operates Algeria's refineries, which were mostly built between the 1960s and the 1980s.

How much oil does Algeria export?

According to the latest estimates by EIA and Global Trade Tracker, Algeria exported an average of 532,000 b/d of crude oil between 2015 and 2024. Crude oil exports declined about 196,000 b/d over the 10-year period as a result of Algeria's declining crude oil production.
