

## SolarInvert Energy Solutions

# Angola energy storage power supply price

## Overview

---

What is the electricity price in Angola?

The electricity price for businesses is AOA 9.640 kWh or USD 0.011. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Angola with 150 other countries. Historical quarterly data, along with the latest update from June 2025 are available for download.

What is energy in Angola?

Energy in Angola describes energy and electricity production, consumption and export from Angola. The energy policy of Angola reflects energy policy and the politics of Angola. Biomass accounts for 58% of the country's energy consumption; oil accounts for 35%, gas 4% and hydroelectric power 3%.

Who manages the energy sector in Angola?

The Ministry of Mineral Resources, Oil, and Gas (MIREMPET) is in charge of the country's oil, gas, and biofuels activities. The Ministry of Energy and Water (MINEA) manages the electricity sector. Angola has a significant gas potential, with estimated reserves of 129 bcm (end of 2023). Proven oil reserves are estimated at 1 Gt (end of 2023).

What is Angola's power sector?

READ MORE on our blog Angola's power sector is characterized by its two main natural resources, petroleum and hydropower. The country has three vertically integrated but overlapping utilities: Empresa Nacional de Electricidade (ENE), Empresa de Distribuição de Electricidade (EDEL) and Gabinete de Aproveitamento do Médio Kwanza (GAMEK).

How much power does Angola need?

nterconnected grid. In order to ensure a safe power supply, even in years of lower hydro flow, Angola should have 9.9 GW of installed capacity – through

increasing power capacity in all sub-systems and through a strong reliance on hydro and gas (which will correspond, respectively, to 66% and 19% of instal.

Will Angola double its energy capacity by 2025?

Electricity tariffs are low and do not cover production costs. Total energy consumption has increased rapidly since 2020. Biomass is the dominant fuel (50% in 2023). Angola aims to double its capacity by 2025 to around 10 GW and to reach a 60% electrification rate. The refining capacity will triple by 2026, with 330 kb/d under construction.
