

## SolarInvert Energy Solutions

# Are 48v and 68v universal inverters reliable

## Overview

---

Do I need a 12V or 48V inverter?

Simply put, if you have a 12V system, you need a 12V inverter; a 48V system requires a 48V inverter. Standard Pure Sine Wave inverters simply change DC power to AC power. Inverter Chargers handle this function plus allow you to charge your batteries off shore power or a generator. Renogy's 3500W Solar Inverter Charger is designed for a 48V system.

Do 48V power inverters work?

48V power inverters work perfectly in 48V solar systems, which are usually either small commercial or large residential. These inverters are typically paired with 48V PV modules and batteries of a comparable voltage.

Is a 24V inverter better than a 48V?

At 48V it drops to a more reasonable 66A. This is actually better than you might think because power loss is proportional to current squared, so if you use your existing wiring and connectors the loss in them will be 4 times higher. A 24V inverter might be a bit cheaper, but you should consider the cost of replacing your wiring and fuses etc.

Is sungod a good inverter?

After that is growatt with being known to be okay. Sungod, Aims and others are pretty much bad quality compared to the others. Same as any other cheap 48v Chinese inverter. 45w and higher idle power draw per phase. They can be worth it, for a cheap summer hut or when your power price per kWh is super low.

Are Deye inverters any good?

Deye inverters are a little bit worse for 48v, the efficiency at low power consumption is lower, they are the best Chinese brand. When you have a high idle power draw (400w+) They are equally to victron in efficiency, but victron

still wins on the long term because they will last longer. After that is growatt with being known to be okay.

Where can I find a good Chinese inverter?

You can generally just Google "inverter x origin" and you'll get your answer pretty fast. On the high voltage side there are a lot of great Chinese inverters same as for microinverters. Huawei, sungrow, deye. Outback Power Radian are US made inverters.
