Are photovoltaic panel prices low now

Overview

Solar prices stay low, battery costs rose modestly. Solar prices stayed at their record-low median of \$2.48 per watt in the first half of 2025, unchanged from H2 2024. Installers absorbed financing pressures rather than raising prices before policy changes kicked in. How much did solar panels cost in 2024?

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024. According to the report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at \$2.50 per watt.

Are solar panels cheaper than they have ever been?

After decades of annual cost reductions as a result of government incentives and expanding manufacturing globally, solar modules and panels are now cheaper than they have ever been. For example, in 1977 solar cells cost \$76.67 per watt, while in late 2020 solar cells were down to \$0.22 per watt.

How much do solar panels cost per watt?

For example, in 1977 solar cells cost \$76.67 per watt, while in late 2020 solar cells were down to \$0.22 per watt. However, this trend of relentlessly dropping prices for solar panels and modules may not continue unabated.

Why did solar panel prices drop 30% in 2024?

Wood Mackenzie reported solar panel prices dropped 30% year-over-year in 2024. Prices may have also lowered due to softened demand, said EnergySage. Residential solar installations declined 31% in 2024. This is “driven by high interest rates, relatively stable residential electricity prices, and California’s Net Billing Tariff,” said the report.

How much does a rooftop solar project cost?

Quotes for rooftop solar projects are averaging \$28,750 before incentives,

said the marketplace operator. Residential solar prices are falling lower than ever before, said marketplace operator EnergySage in its biannual solar and storage marketplace report.

Should you buy solar panels for your home?

In summary, purchasing solar panels for your home sooner rather than later is in your best interest as a homeowner. You can begin saving on electricity immediately and secure flat energy costs, rather than paying for ever increasing rates. You would also be entering the market at its lowest price point, before PV panels go up in cost.
