Are there any 5G base stations in Lithuania

Overview

When will 5G be available in Lithuania?

Intensive development of 5G base stations is planned throughout 2023. The focus will be on the northeastern Lithuania, where all base stations are planned to be updated with Ericsson network equipment. By mid-summer 2023, Telia Lietuva 5G connection will cover 99 percent of Lithuania's territory. 5G devices and plans.

Does Telia have 5G in Lithuania?

. Telia, the leading Nordic and Baltic digital communications company, through an exclusive partnership with Ericsson, has reached a significant milestone of achieving 99 percent geographical 5G coverage in Lithuania.

What frequencies does 5G use in Lithuania?

5G communication operating in Lithuania uses 3.5 GHz and 700 MHz frequencies. Devices in the 3.5 GHz frequency coverage area will be able to reach speeds of up to 2 gigabits per second (2 Gbps). Where 3.5 GHz can't reach, devices will automatically use the wide coverage 5G connection in the 700 MHz frequency band.

Why is Lithuania a great 5G destination?

This remarkable achievement not only establishes Lithuania as a standout player in the global 5G landscape but also unlocks boundless possibilities across various industries, fueling economic growth, and positioning Lithuania as an attractive destination for investors and technology developers.

How does technology drive economic growth in Lithuania?

The impact of this achievement extends beyond superior quality services. It drives economic growth in Lithuania by attracting investors and enables various applications, including fixed wireless access, enhanced workspaces, immersive reality experiences, and the potential for autonomous deliveries.

What is 5G Massive MIMO radio?

Ericsson's 5G Massive MIMO radio has been instrumental in this achievement. The antenna-integrated radio (AIR) solution, specifically AIR 3268, with its smaller and lighter design, offers increased bandwidth and higher capacity, enabling Telia to provide lightning-fast and reliable 5G connectivity across the entire country.
