

SolarInvert Energy Solutions

Armenia Foreign Trade Export Energy Storage Company

Overview

Why is Armenia a heavily dependent on energy imports?

This makes Armenia a country heavily dependent on energy imports. According to the Review by the International Energy Agency, the energy mix of Armenia was dominated by natural gas (58.8% of total energy supply in 2022), and Armenia's domestic energy production comes mostly from nuclear and hydro resources. Figure 2.

Which country imports natural gas to Armenia?

Natural gas is imported primarily from Russia through Georgia, with a limited volume of natural gas imported from Iran in an electricity-for-gas swap arrangement. Nuclear fuel is imported from Russia. Armenia's energy consumption efficiency is low compared to developed countries.

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.

Does Armenia have oil and natural gas reserves?

Since Armenia has no significant fossil fuel reserves, the country's positions in crude oil and natural gas remain blank in the chart above. The strongest indicators reflected on the graph are Combination production-consumption for coal (0.76) and Combination of electricity production-consumption (0.61).

How has the energy sector changed in Armenia?

Armenia's energy sector has moved from a state of severe crisis in the early 1990s to relative stability today. A combination of policy, legal, regulatory, and institutional reforms have had good results.

How much electricity does Armenia produce?

Armenia produces almost as much electricity from nuclear power as from hydroelectricity. According to the U.S. Energy Information Administration data, gross electricity generation was dominated by fossil fuels (43.4%), followed by hydroelectricity (22.8%), nuclear energy (30.0%), and other renewable sources (3.8%).
