How much does a solar inverter cost?

Solar inverters vary quite a bit in price. Micro inverters can start as low as \$195 apiece. String inverters can vary from \$500 to around \$5,000. Meanwhile, hybrid inverters are anywhere from \$600 to around \$4,000. When choosing a system, you'll often have a budget or premium option.

How many kW inverters are allowed in Western Australia?

5kW hybrid three phase inverters. 10kW hybrid three phase inverters. 15kW hybrid three phase inverters. From July 1st 2025 we are allowed in Western Australia. Up to 10 kW of inverters on single phase. Up to 15 kW of inverters on three phase. Growatt are the only 'cheaper' brand we consider good enough to supply and install.

How do I choose a solar inverter?

There are a few factors worth considering when choosing a solar inverter for your setup (beyond budget, of course) These include: Efficiency tells you how much of the energy captured by your solar panels actually makes it into your home as usable electricity. A higher efficiency rating means less energy is lost in the conversion process.

Why should you buy a solar inverter in 2025?

Many modern solar inverters are packed with intelligent features designed to help you monitor, control, and optimise your energy use. Many 2025 models now come with bi-directional capabilities. This means they can store surplus solar energy in home batteries for later use, and if necessary, supply power back to the grid.

Should you buy a solar inverter?

This means they can store surplus solar energy in home batteries for later use, and if necessary, supply power back to the grid. With solar inverters, good after-sales support and solid warranties are essential. Here's what to look for:  
Warranty Length: Expect 5 to 15 years as standard.
