

## SolarInvert Energy Solutions

# BYD inverter manufacturer

## Overview

---

BYD saw a significant rise in market share for its self-developed traction inverters in Q2 as it claimed 17% thanks to strong sales of its PHEV models. This ties BYD with Japan's Denso for the top spot globally. Is BYD launching its first integrated storage system for residential applications?

From ESS News BYD Energy Storage, a unit of Chinese conglomerate BYD, has launched what it claims to be its first integrated storage system for residential applications. The Battery-Box HVE system is being sold in combination with either a single-phase hybrid inverter or a three-phase device.

What is the capacity of BYD energy storage system?

The system is available in two versions with capacities of 4.29 kWh and 6.45 kWh. From ESS News BYD Energy Storage, a unit of Chinese conglomerate BYD, has launched what it claims to be its first integrated storage system for residential applications.

Who uses BYD's photovoltaic energy solutions?

BYD's photovoltaic energy solutions are applied in small, medium and large-scale solutions for residential, commercial, industrial, rural, investors, energy concessionaires, among others. BYD has a photovoltaic plant in Campinas (SP) dedicated to Research and Development (R&D) in Brazil.

What does BYD do?

As a provider of integrated renewable energy solutions, BYD produces relevant products like batteries, solar energy products, and energy storage products, building a complete industry chain from energy generation and storage to application.

How many boards are used in a BYD inverter?

Eleven boards were discovered. Four are used in the inverter area, the other ones in the OBC/DC-DC. Main component identification reveals that BYD still

relies on foreign providers for most of the electronic components (led by Texas Instruments).

What is BYD energy do Brasil?

BYD Energy do Brasil is the country's largest manufacturer of photovoltaic modules. With a factory in Campinas, the company has already produced more than 2.5 million photovoltaic modules in Brazil. This figure represents approximately 6.5 million tons less CO<sub>2</sub> per year, the equivalent of planting 300 million trees.
