Base station power cabinet installation quota

Overview

What are the minimum clearance requirements for a base station?

Minimum clearances must be maintained between the cabinets and surrounding building parts/cabinet to accommodate the installation and maintenance of the base station. The following constraints must be considered for cabinet clearances:

How to install a battery cabinet?

Check the battery cabinet placement against the construction drawing. Ensure there is maintenance space and a distance of more than 0.5 meters from heat sources. Follow the battery installation diagram and manual for installation. Wipe dust off battery terminals and check that each bolt is tightened before installing connection bars.

What is the minimum space between ezbfi frame and UMTS macrocell cabinet?

Minimum space between the EZBFi frame and the adjacent cabinet or frame is 57 mm (2.24 in.) (if the edge of the template is cut at the dotted line). The following diagram shows the clearance requirements for the indoor UMTS Macrocell cabinet from the top of the cabinet to the cable rack and from the top of the cable rack to the ceiling.

Can a meter be installed above a basement level?

For multiple meter packs refer to figure 19 In general, meters shall not be installed above the first story level or below the first basement level of a building. Space and clearance requirements for indoor metering installations are the same as for outdoor metering.

Where should a meter socket be located for a commercial metering installation?

For those commercial metering installations that the Company installs bushing

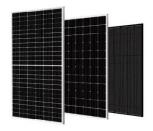

type current transformers in Company pad-mount transformers, the customer will install, per Figure 13, the transformer rated meter socket on the side of the building if the Company's pad-mount transformer is within 25 feet.

Can ezbfi cabinets be placed on a side wall?

Notes: The cabinets may be placed with zero clearance to the rear wall. The cabinets may be placed with zero clearance to the side wall, however some clearance is recommended. Minimum space between the EZBFi frame and the adjacent cabinet or frame is 57 mm (2.24 in.) (if the edge of the template is cut at the dotted line).
