Base station power supply supporting site cabinet list

Overview

What makes the mts2 a good base station?

The ultra flexible MTS2 meets a growing demand for small, deployable base stations that ensure site acquisition and installation is as easy and economical as possible. MTS2 fully complies with the RoHS directive. Small, light and versatile, the MTS2 is a high performance base station that can be installed in all kinds of locations.

What is a RBS 6201 cabinet?

Employing a simplified cabinet design and an innovative modular building practice, the RBS 6201 integrates a complete high-capacity site into a single cabinet. The cabinet contains two radio shelves and all power, transport network and supporting equipment.

What is a site power system?

Software applications allows for managed shutdown of AC/DC units and system parts in order to save energy and extend battery operation. The built-in site power system eliminates the need for a separate site power plant. The system can handle battery charging of any lead acid batteries.

What RF technology does a RBS 6000 base station support?

The radio shelf in RBS 6000 base stations supports a wide variety of RU and DU for all main frequency bands and any combination of Radio Frequency (RF) technologies (GSM, WCDMA, or LTE). The RU consists of a filter and a multi-carrier power amplifier.
