Battery cabinet power distribution unit function

Overview

PDUs vary from simple and inexpensive to larger floor-mounted PDUs with multiple functions including power filtering to improve power quality, intelligent load balancing, and remote monitoring and control by over . This kind of PDU placement offers intelligent capabilities such as power metering at the inlet, outlet, and PDU branch circuit level and support for environment sensors.

The PDU is responsible for managing and distributing electrical power from the main battery pack to various subsystems such as the drivetrain, HVAC system, infotainment, and lighting.
