

SolarInvert Energy Solutions

Battery cabinet processing factory

Overview

Where are man batteries made?

The German state of Bavaria supports research and development of battery technology at MAN's Nuremberg facility with approximately €30 million. It has enabled the integration of laser-welded cells, which MAN describes as the "most innovative, efficient and gentle production technology in battery module construction."

When will a new battery factory be built in Nuremberg?

It was decided back in 2020 to build a mass production facility for battery packs in Nuremberg. With support from the city of Nuremberg and the Free State of Bavaria, together with a €100 million investment, the new M50 building will be completed by 2024, providing 16,000 m² of space for the production of high-voltage batteries.

How do man batteries work?

Using an 8 kW disc laser, robot-guided optics, and highly precise sensors, individual battery cells are electrically connected with the utmost precision and quality. MAN works with the Technical University of Munich to advance this technology for the future generation of batteries.

Where are high-voltage batteries made?

From April 2025, high-voltage batteries will be manufactured industrially in Nuremberg using state-of-the-art production methods on 17,000 square metres. This will create almost 350 new jobs for the future. MAN will be the first commercial vehicle manufacturer to start its own battery series production in Germany.

Where are man eTruck batteries made?

A few weeks after the delivery of the very first MAN eTruck to a customer, the topping-out ceremony is the next highlight for the Munich-based commercial

vehicle manufacturer. From April 2025, high-voltage batteries will be manufactured industrially in Nuremberg using state-of-the-art production methods on 17,000square metres.

Battery cabinet processing factory

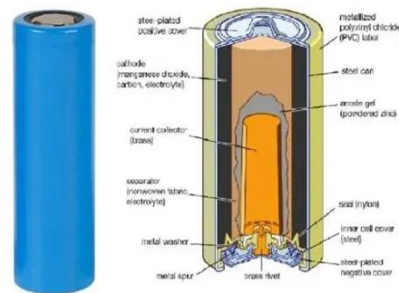

Energy Storage Cabinet Sheet Metal Processing Solutions - ...

Customized sheet metal processing for small and medium-sized batches, 100% full inspection for shipment, worry free quality, and strict confidentiality of all processing drawings.
