

## SolarInvert Energy Solutions

# Battery cabinet requirements for distribution rooms

## Overview

---

Minimum cabinet height = Rack height (to top of rail) + Battery height + Space above battery (12" ideal) + Charger height + 6" (for space above charger) Chargers need room to breathe and batteries need extra room above for maintenance (watering and testing). What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

What are the requirements for battery installation?

§ 111.15-5 Battery installation. (a) Large batteries. Each large battery installation must be in a room that is only for batteries or a box on deck. Installed electrical equipment must meet the hazardous location requirements in subpart 111.105 of this part. (b) Moderate batteries.

What are the requirements for a large battery room?

Each battery room for large battery installations must have a power exhaust ventilation system and have openings for intake air near the floor that allow the passage of the quantity of air that must be expelled. The quantity of the air expelled must be at least:  $q = 3.89 (i) (n)$ . where:  $q$  = quantity of expelled air in cubic feet per hour.

What are the requirements for a battery layout?

The layout should accommodate: 2. Structural Requirements Floor loading capacity is critical - industrial batteries typically weigh 1500-3000 kg/m<sup>2</sup>. For VLA (flooded) batteries, acid-resistant floor coatings compliant with AS/NZS 2430.3.2 are required.

What are the requirements for a battery location?

Battery locations shall conform to 480.9 (A), (B), and (C). (A) Ventilation. Provisions appropriate to the battery technology shall be made for sufficient diffusion and ventilation of gases from the battery, if present, to prevent the accumulation of an explosive mixture. (B) Live Parts. Guarding of live parts shall comply with 110.27.

What are the requirements for a battery handling facility?

Floors shall be of acid resistant construction unless protected from acid accumulations. Face shields, aprons, and rubber gloves shall be provided for workers handling acids or batteries. Facilities for quick drenching of the eyes and body shall be provided within 25 feet (7.62 m) of battery handling areas.
