Battery cabinet voltage shows 0V

Overview

Seeing a 0V reading across your lithium battery terminals can be alarming—but it doesn't always mean your battery is permanently dead. For LiFePO_4 (Lithium Iron Phosphate) batteries, 0 volts is often a protective safety response triggered by the internal BMS (Battery Management System).

Battery cabinet voltage shows 0V

Recovering a LiFePO4 cell (A123) at 0V

Can a LiFePO4 cell be recovered from 0V? I applied a constant current power supply to one of the cells at 0V by tapping into its ends directly in the exposed pack, and at 400mA ...
