

SolarInvert Energy Solutions

Battery cabinet with site power supply

Overview

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.

What is a battery storage cabinet?

In terms of storage, cabinets are usually constructed from sheet steel, with an acid-resistant powder coating. Features may include close-fitting, lockable doors, steel shelving and a spill containment sump to contain any battery acid leaks or spills.

What are Arimon battery cabinets?

Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries. All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors.

Why do we need a battery enclosure?

When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible. The role of batteries in producing emergency power supply for industries across the country is vital for our infrastructure. C&C Power Battery enclosures are configured to meet the need of all types of applications.

What is a battery rack made of?

Made with welded heavy-gauge steel construction, our battery backup cabinets and battery racks are made to last and designed with options to give your facility a unified look. We offer multiple battery racks with different

configurations, including both rack mount and cube layout units. Either option can be custom configured.

Does C&C power offer a battery rack?

C&C Power offers multiple battery racks with an array of configurations, including both rack mount and shelf layout units. Either option can be configured to the form that most effectively meets your needs.
