

## SolarInvert Energy Solutions

# Belgian photovoltaic power station energy storage project bidding

## Overview

---

Where is the battery energy storage project located in Belgium?

Once completed, the four-hour battery energy storage project will operate under a 15-year contract with Elia, Belgium's electricity grid operator, and be located next to Engie's gas power plant in Vilvoorde. From pv magazine ESS News site.

How many MW of battery energy storage system Engie reaches in Europe?

With this new project, ENGIE reaches 500 MW of BESS capacity in Europe, either installed, under construction or at an advanced stage of development. On 31 October 2024, Belgian grid operator Elia announced the result of the country's 4th CRM auction and the selection of ENGIE's Battery Energy Storage System (BESS) project in Kallo.

Will Engie be able to build a new battery plant in Belgium?

Engie described this as "a double success within the CRM framework," which ensures a future for its site in Belgium. The Vilvoorde BESS project will be launched in two phases, with the commissioning of 100 MW of batteries in September 2025, and a further 100 MW in January 2026.

Why is Belgium a good place to invest in a battery?

Other factors that make Belgium an appealing location for battery investments are the exemption of TSO grid fees and high revenues from balancing market (mainly FCR and aFRR)," Simon De Clercq, senior research associate at Aurora Energy Research, told ESS News.

Why is Belgium's storage fleet growing so fast?

Belgium's storage fleet is growing at a fast pace, not the least due to the opportunity to secure contracted revenues via its CRM auctions. On the last day of October, system operator Elia published the results of the CRM auctions held this year, showing that a total of 450 MW of BESS had secured contracts.

How did the energy crisis affect Belgian nuclear power?

“In 2022, the energy crisis led to a partial reversal of the Belgian nuclear phase-out. The lifetimes of the nuclear reactors of Doel 4 and Tihange 3, with a total capacity of 2.1 GW, were extended until 2035. This reduced the need for additional capacity in the Belgian power system.

## Belgian photovoltaic power station energy storage project bidding

### Integrated Power & Renewables: TotalEnergies ...

Paris, May 15, 2023 - TotalEnergies has launched at its Antwerp refinery (Belgium), a battery farm project for energy storage with a power rating of 25 ...
