

## SolarInvert Energy Solutions

# British energy storage vehicle equipment manufacturer

### Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

## Overview

---

Why is the UK investing in EV battery technology?

The UK is investing in new battery technologies. In January 2023, the government funded 17 projects to boost innovation. These focus on improving EV battery propulsion systems. UK Research and Innovation's Faraday Battery Challenge is leading this effort. It's providing £27.6 million to support these projects.

How EV battery production is growing in the UK?

The UK is seeing major growth in electric vehicle battery manufacturing. New factories and investments are creating jobs and boosting the country's EV industry. Coventry is becoming a hub for EV battery production. A joint venture between Williams Advanced Engineering and AMTE Power plans to build a new battery factory in the city.

Why do UK carmakers need a battery supplier?

UK carmakers like Jaguar Land Rover will benefit from having battery suppliers close to home. This local production is seen as crucial for the future of British automaking. It will help the UK transition to electric vehicles and move closer to its net zero goals. The UK's electric vehicle battery industry is growing rapidly.
