

## SolarInvert Energy Solutions

# British power generation container

### Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

## Overview

---

Where can a containerised generator be used?

It can be used in various applications such as remote locations, disaster recovery, events, back-up power and construction sites where there is a need for reliable power supply. Each manufactured containerised generator is acoustically lined to achieve the external sound levels required at your site.

What is a containerised diesel generator?

A containerised diesel generator is a complete power unit housed in a modified ISO shipping container, offering long runtimes, noise control, and protection from the elements. These generators are ideal for remote sites, industrial operations, and export use, where durability and mobility are essential.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65, 70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application

(power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

What BS 7671 standards does a container house generator have?

All wiring is designed to meet BS 7671 standards, ensuring compliance and reliability. These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs. Contact us today to discuss your requirements.
