Brunei Communications 5G Base Station 2MWH

Overview

When will 5G mobile services be available in Brunei?

Brunei begins the start of a new digital era as the 5th Generation (5G) Mobile Services are now available nationwide as of Thursday; a milestone in the development of the sultanate's technological landscape.

What is the 5G pilot project in Brunei Darussalam?

In April 2021, Brunei Darussalam launched its 5G Pilot Project, as commissioned by the Ministry of Transport and Infocommunications (MTIC) and spearheaded by AITI with the deployment of 5G base stations by UNN at selected locations.

Does Brunei have a 5G telco?

Courtesy of AiTi During the 5G launch event at The Empire hotel, Brunei's three telcos — DST, imagine and Progresif — confirmed that pricing for postpaid mobile plans will remain unchanged.

Is Brunei undergoing a digital revolution?

Brunei Darussalam, a small but wealthy nation on Borneo, is undergoing an internet revolution that defies its size. With nearly 99% of its people online datareportal.com and a nationwide rollout of 5G mobile and fiber broadband, Brunei's digital landscape has leapt ahead in recent years.

Why does Brunei have a small telecom market?

Small Market Size: With only ~450k people, Brunei's telecom market is tiny. This limits economies of scale – network infrastructure is expensive, and fewer customers means higher cost per user to recoup investments. This was one reason all networks were consolidated under UNN; competing networks would have been unsustainable.

What is a 5G trial in Brunei Darussalam?

This trial is conducted prior to the introduction of 5G services scheduled to launch in Brunei Darussalam in the coming months, utilising new and existing radiofrequency spectrum to provide high-capacity bandwidth in all high internet traffic areas.
