

## SolarInvert Energy Solutions

# Bulgarian light-transmitting series BIPV solar panel components

## Overview

---

What is a BIPV solar system?

BIPV ('building integrated photovoltaics') systems are solar power generating products or systems that are seamlessly integrated into the building envelope and part of building components such as façades, roofs or windows.

How photovoltaic materials can help a BIPV installation?

If you are interested in designing a futuristic, sophisticated and green image, photovoltaic materials will help greatly. Solar Innova modules integrated photovoltaic technology used in the BIPV installations are multifunctional.

How can a BIPV solar system be transparent?

Varying degrees of transparency can be achieved with most technologies by either spacing opaque solar cells or making the thin film layer transparent. BIPV modules replace conventional building envelope materials while also generating power.

What is solar Innova BIPV photovoltaic modules?

Solar Innova BIPV photovoltaic modules line has been developed considering engineers and architects to provide them of modules that can be integrated functionally and aesthetically into facades and roofs where simultaneously serve as an architectonic material and energy generator.

Can metsolar manufacture BIPV glass solar modules?

In addition to manufacturing BIPV modules, Metsolar will professionally consult in development of custom solar solution to meet the design and energy requirements for buildings powered with integrated photovoltaics. BIPV glass solar modules are valued for their properties of longevity and resistancy to environmental conditions.

Why do you need a BIPV system in a skylight?

The use of BIPV systems in skylights also provides a touch of exclusivity and elegance. Photovoltaic balconies allow to take full advantage of this part of the surface of an apartment or a building exposed to sunlight and at the same time, are a way to improve their appearance.

## Bulgarian light-transmitting series BIPV solar panel components
