Cambodia Solar Sun Room

Overview

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

Does Cambodia have a solar generation regulation?

In 2018, Cambodia introduced a solar generation regulation, a new driver for the country's solar PV system development. Cambodia's grid-scale solar development started with just a 10 MW pilot in 2017.

How long does it take to install solar in Cambodia?

In January 2018, the Cambodian Government introduced a regulation for customers installing solar. The following summarises the regulation and the changes made to date: No Implementation Process or Procedure (e.g., forms, timelines etc) released except indication that it should take 1 month.

Will Cambodia's solar farm development change?

So far, large-scale solar farm development has moved slowly in light of the country's immense amount of untapped shine. But that picture may be starting to change. In 2018, Cambodia introduced a solar generation regulation, a new driver for the country's solar PV system development.
