

SolarInvert Energy Solutions

Canadian energy storage lead-acid battery wholesale

Overview

What types of batteries does Canadian energy offer?

Canadian Energy provides batteries for transportation, motive, and renewable energy applications. Whether you are looking for Flooded Lead-Acid, Mixtech, AGM or Lithium batteries we have you covered. If you're having trouble finding what you're looking for try our battery finder or look for a specific application.

What is a sealed lead acid battery?

Canbat is constantly developing new battery technologies to meet the demands of the evolving global battery market. Sealed lead-acid batteries are often referred to as valve-regulated lead-acid (VRLA), or simply sealed lead acid (SLA). There are primarily two types of these batteries: AGM and Gel.

Who are Canadian battery companies?

They cater to a wide range of industries, including automotive, marine, renewable energy, and telecommunications. Canadian battery companies are known for their high-quality products and innovative solutions, as well as their commitment to sustainability and environmental responsibility.

Are lithium batteries better than lead-acid batteries?

Lithium batteries have 10 times higher cycle life and are 60% lighter than lead-acid batteries. Canbat is Canada's #1 lithium battery company. Canbat lead carbon batteries are designed with PSOC compatibility for ultra-fast charging capability, efficiency and more than three times as many cycles as standard AGM batteries.

Where can I find the best batteries & power conversion solutions?

With headquarters in Calgary, Alberta, we provide the best batteries and power conversion solutions for Transportation, Motive Power, Energy Storage and Stationary Infrastructure applications. We have 19 branches across the country and a network of over 10,000 dealers nationwide.

Why is energy storage important in Canada?

With a target of net-zero emissions by 2050, energy storage is vital for enhancing grid reliability and integrating renewables. Currently, Canada's installed storage capacity is under 1 GW, but projections indicate a need to boost it to over 12,000 MW by 2030, making the market ripe for development and financing.
