

SolarInvert Energy Solutions

China-Europe Solar Integrated System Manufacturer

Overview

What is the role of European companies in the solar industry?

In the solar sector, European companies originally played a key role in developing the production equipment needed for the mass production of solar wafers, cells, and modules. While the rise of China's solar manufacturing sector initially provided a significant export market, a highly competitive local industry has since emerged.

Is China's solar industry a competitive market?

While the rise of China's solar manufacturing sector initially provided a significant export market, a highly competitive local industry has since emerged. Today, at least 38 European solar PV module production equipment manufacturers operate on the continent, in nine countries (DE, FR, IT, NL, CH, ES, HU, FI, NO).

How many solar PV modules are made in Europe?

Today, at least 38 European solar PV module production equipment manufacturers operate on the continent, in nine countries (DE, FR, IT, NL, CH, ES, HU, FI, NO). Most - 75% - are active in the cells and modules equipment manufacturing segment.

Does China have a solar power market?

In contrast, China charted a deliberate industrial course, pouring more than \$50 billion into scaling its solar PV capacity—ten times more than all EU countries combined. It vertically integrated its supply chains, slashed costs through massive economies of scale, and captured the market.

Is Europe reviving its solar ecosystem?

It is the launchpad behind ventures such as H2 Green Steel and Northvolt, and is now betting big on reviving sovereignty of Europe's solar ecosystem. Europe's fall from solar manufacturing grace wasn't due to a lack of

innovation. “Europe was leading because market demand and technology leadership coincided,” Sanz explains.

Is InnoEnergy Reviving Europe's solar ecosystem?

InnoEnergy has helped build four industrial unicorns and is currently mobilising €160 billion in cleantech investment by 2030. It is the launchpad behind ventures such as H2 Green Steel and Northvolt, and is now betting big on reviving sovereignty of Europe’s solar ecosystem.
