# China s 5G base stations exceed 600 000

## Overview

---

How many 5G base stations has China built?

China has exceeded its target for 5G base stations six months ahead of time, having built 3 million of them by the end of June, latest government data showed. The figures also suggest that China is leaving the United States far behind in the 5G connectivity race, with more than 600,000 new stations added in the last three months alone.

How many base stations will China install in a year?

China's Ministry of Industry and Information Technology (MIIT) set itself an ambitious goal of installing three million of them by the end of the year. Over the last three months, more than 600,000 installations were completed to achieve the target six months prior and leaving the US far behind in absolute numbers of base stations.

Is China leaving the US behind in 5G connectivity?

The figures also suggest that China is leaving the United States far behind in the 5G connectivity race, with more than 600,000 new stations added in the last three months alone. By comparison, the US built about 100,000 5G base stations between 2019 and 2021, according to the latest available industrial estimate.

How much does a 5G module cost in China?

The average price of a 5G module for industrial application in China has dropped below 400 yuan (US\$55.41), while the energy consumption of each base station has fallen by more than 20 per cent compared with the early deployment period, according to the ministry. China first started rolling out 5G stations around 2019.

How 5G is boosting China's Global Competitiveness?

The rapid spread of advanced communications infrastructure has sped up the

technological upgrade of Chinese industries and strengthened their global competitiveness, Zhao and another senior MIIT official said. The number of 5G base stations determines the coverage and capacity of the network.

How big is the 5G network market in China?

The number of 5G terminal connections exceeded 200 million, covering all cities at and above the prefectural level. Total telecommunication services experienced year-on-year growth of 20.6 percent, and the revenue from software and information services rose 13.3 percent from 2019, said Tian.
