

## SolarInvert Energy Solutions

# Civilian communication base station manufacturers

## Overview

---

What does a base station do?

It serves as the central hub that connects multiple user devices (such as radios, mobile phones, or IoT devices) to a network, enabling long-range communication. Base stations are equipped with transmitters and receivers, which help to send and receive radio signals to and from mobile devices.

What are the different types of base station products?

Our Base Station product offering consists of a wide range of antenna types and features to meet the exact needs of our customers. These products consist of Collinear, Dipole, Panel, Ground Plane, Corner Reflectors and Yagi types.

How many radio talk groups can a BCC-tactical connect to?

Connect up to five radio networks and create four radio talk groups  
Compatible with all military and commercial radios, both ciphertext and plaintext  
Link each radio talk group to a SIP extension, keylock switch to isolate the Interoperability Board from SIP or both SIP and LAN WAN, LTE, LAN, WiFi, and VPN connectivity  
Why choose the BCC-TACTICAL?

.

What is BCC tactical?

Expeditionary communications system for use in harsh conditions. The BCC-TACTICAL is frequency- and radio-agnostic, acting as a cross-band, cross-platform, and cross-encryption gateway. The integrated unified communication software provides a robust flexible platform that can be deployed in public, private, and hybrid cloud environments.

What is bf-tr950 DMR trunking base station?

BF-TR950 is a carrier level DMR Trunking base station designed with unit

module, featured enhanced extensibility and rich functions. It supports failure fallback mode, inter-site call handling, whole site backup, and allows backup station to automatically take over to deliver enhanced reliability.
