

SolarInvert Energy Solutions

Communication base station battery module

Overview

The battery module uses a high-life lithium iron phosphate battery cell, MTBF reaches 150,000 hours; Blade heat dissipation design, meet IP65 waterproof grade; The explosion-proof valve design between the single cell can ensure that the battery pack will not ignite or detonate when it meets the open flame; At the same time, the weight and volume are controlled in a reasonable range, which is convenient for construction personnel to mount on site.

Communication base station battery module

Backup LiFePO4 Battery for Communication Base Station ...

The battery module adopts a modular design and can be connected in parallel to form lithium battery packs of various capacities, meeting the various needs of backup power for open ...
