

SolarInvert Energy Solutions

Composition of solar lighting system

Overview

At the heart of solar-powered lighting systems are photovoltaic (PV) cells. These cells are made from semiconductor materials, typically silicon, which have the ability to convert sunlight directly into electricity.

Composition of solar lighting system

The Solar System

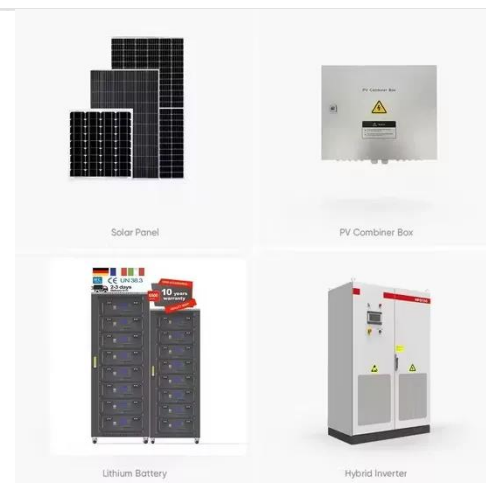

Our solar system consists of an average star we call the Sun, the planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto. It includes: the satellites of the planets; ...
