

## SolarInvert Energy Solutions

# Container power generation in Lithuania

## Overview

---

Lithuania imports 70% of its electrical power, since 2022, mostly from Sweden. In 2015, transmission lines connected Lithuania to Sweden (700MW) and Poland (500MW). Construction of 200 MW / 200 MWh grid batteries started in 2022, to increase grid stability. Following the Russian invasion of Ukraine.

Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Fossil fuels Natural gas In order to break down monopoly in the natural gas market of Lithuania,

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

How many battery energy storage systems are there in Lithuania?

The four battery energy storage systems (BESS), 50MW/50MWh each, have been handed over by Fluence and are now providing services to Litgrid, the transmission system operator (TSO) in Lithuania. They followed a smaller, 1MW/1MWh pilot project to test the use case back in 2021.

How DH & C systems are being implemented in Lithuania?

Currently part of DH systems in Lithuania is installing and/or planning to install heat storage facilities, which will enable an increase the efficiency and enhance the living age of biomass-burning DH&C systems. These are mainly insulated hot water tanks and/or underground water tank storage.

How much electricity does Lithuania generate?

According to Litgrid's (Lithuania's electricity transmission system operator)

preliminary data, in the first half of the year 2024, the national electricity generation amounted to 3,783.4 GWh, of which RES accounted for 2,990.1 GWh.

What are the main sectors of RES development in Lithuania?

According to the National Energy Independence Strategy, there are three main sectors, where the development of RES is planned and accounted for in the National statistics of Lithuania: the electricity sector, the district heating/cooling sector, and the transport sector.

How much balancing capacity does Lithuania need?

So the whole region would need around 1GW of balancing capacities but Lithuania alone will need around 700-800MW of capacity for FRR. We have applications to build 800-900MW of storage, and those with a letter of intent (LOI) and bank deposit total around 150MW today.
