

SolarInvert Energy Solutions

Container power generation protection level

Overview

Does DNV accept a containerised generator set (CGS) installation?

DNV often receives customer requests for acceptance of installations involving Containerised Generator Set (CGS) arrangements. This newsletter aims to define the guidelines and requirements that clarify mainly DNV acceptance criteria for the temporary installation of a CGS.

What is a containerised generator?

With sound proofing by means of the acoustic lined container that is both lockable and weather proof – these are usually installed outside a building in a car park or outside the intake room. Containerised generators are usually larger generators above 500kVA and upward, and are 80dbA @ 1 metres noise level.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Why should you choose a containerised generator?

Containerised Generators are trusted across industries where reliability and resilience are non-negotiable, such as Healthcare and Rail infrastructure. Every unit can be tailored to your project with options for fuel type, noise attenuation, and space-saving layout.

Container power generation protection level

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

Container Generators: What's the Difference?

Container generators offer a range of advantages, including enhanced protection, noise reduction, mobility, and integrated features.
