

## SolarInvert Energy Solutions

# Containerized power generation supply

## Overview

---

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized units delivered, our genset containers offer optimal performance in various site conditions.

The overall package (gas engine, container, and auxiliary components) is designed to meet 65 dB(A) in 10m (surface sound pressure level according to DIN 45635). Lower sound pressure levels are available on request.

A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat.

The standard ventilation is designed for ambient temperatures from -25°C to +34°C. All genset containers are also available with an option for -40°C and most variants can be.

What is a containerized power solution?

Each containerized power solution by Liyu Power is built to meet rigorous demands, ensuring stable and long-lasting energy in diverse environments. With our high-performance gas engines enclosed in durable containers, you gain a flexible and robust power source suitable for various industries and remote projects.

What is a containerised generator set?

The compact design of containerised generator sets makes them highly mobile and easy to transport. The entire power generation system, including the generator, fuel tank, and control systems, is integrated into a single container.

What are the benefits of a single container power generation system?

The entire power generation system, including the generator, fuel tank, and control systems, is integrated into a single container. This portability is especially advantageous for industries that require power at multiple locations

or for temporary projects such as construction sites, events, or disaster response operations.

What is a generator container?

These containers are designed to protect the generator from external elements, ensuring secure operation in diverse environments. The generator sets within these containers can vary in size and capacity, making them suitable for a wide range of applications.

How many power supplies can be mounted in a 40ft container?

Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. Depending upon specifications, containerized power supplies may be stacked, or located side-by-side. Setup and testing or shut-down and packing can be achieved within a matter of days.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.
