

SolarInvert Energy Solutions

Contracting the accounting of the communication base station inverter enterprise

Overview

Is a utility transaction a business combination or an asset acquisition?

Issues commonly encountered in the utility industry include making the judgement about whether a transaction is a business combination or an asset acquisition. The distinction is likely to have a significant impact on the recognition and valuation of intangible assets, goodwill and deferred tax.

Which sub-accounts are credited during the commissioning of the terrestrial power plant?

During the commissioning of the terrestrial power plant, we debit sub- account 103 "Buildings and structures", and the roof - sub-account 104 "Machinery and equipment" and credit one of these sub-accounts of account 15 "Capital investments". The conditions for licensing electricity generation activities have been studied.

Why did entities a and B bring together their power plants?

Entities A and B have brought together their power plants in a market in order to strengthen their market position and reduce costs. They established a new entity, J, and contributed the plants to Entity J. Entity A receives 60% of the shares in Entity J, and Entity B receives 40%.

What should a reporting entity consider when accounting for contracts?

In accounting for such contracts, the reporting entity should first analyse whether it has a written option or a purchased option. In cases where the buyer has the right to choose the volume of the commodity purchased, the buyer has a purchased option and the supplier a written option.
