

SolarInvert Energy Solutions

Croatia large-capacity energy storage battery

Warranty
10 years

LiFePO₄

Intelligent BMS

Wide Temp:
-20°C to 55°C

Overview

Can Croatia become a regional leader in battery energy storage?

The participants agreed that Croatia has the potential to become a regional leader in the integration of renewable sources and battery energy storage, but this requires a rapid modernization of the transmission and distribution network, as well as legislative adjustments.

Will increasing battery storage capacity reduce electricity prices?

Maja Pokrovac, director of RES Croatia, highlighted that increasing battery storage capacity could reduce electricity prices by 25% by 2030, stressing the urgent need to accelerate the adoption of a regulatory framework that would enable faster development and deployment of new capacities.

How does a lack of energy storage capacity affect energy consumption?

The lack of energy storage capacity further increases dependence on electricity imports, which accounted for as much as a quarter of domestic consumption last summer.

Croatia large-capacity energy storage battery

Subsidy of 20 million euros for Croatian grid-scale battery project

This project is extremely important because it will contribute to the modernization of the grid and increase the security of energy supply, for both Croatia and the EU. IE-Energy ...
